

Blue Lake HWM Removal Report 2021

PO Box 1134 Minocqua, WI 54548

Blue Lake HWM Manual Removal Summary 2021

Overview: On June 30th, Aquatic Plant Management LLC (APM) conducted hand harvesting of Hybrid Watermilfoil (HWM) on Blue Lake in Oneida County, WI. The team, consisting of four divers, focused their efforts at two sites with mapped single or few HWM plants from a June 10th HWM survey conducted by Onterra LLC. In addition, APM divers dove along much of the lake's shoreline, finding and removing additional HWM plants at three additional locations that were not identified during the June 10th survey. All single or few HWM plant occurrences were documented with GPS coordinates. In total APM was able to remove **2.5 cubic feet of HWM** from Blue Lake.

Date	Weather Conditions	Water Temp (F)	Underwater Dive Time (hrs)	AIS Removed (cubic ft)
6/30/2021	Sunny	77	6.5	2.5
Grand Total			6.5	2.5
<hr/>				
Dive Location	Avg. Water Depth	# of Dives	Underwater Dive Time	AIS Removed (cubic feet)
Bay E of channel	5.5	1	0.3	0.0
Mapped Single Plants NW Corner	3.5	2	1.8	0.5
Mapped Single Plants W Shoreline	4.5	1	1.0	0.5
N Bay	6.5	1	0.8	0.0
N Bay - Northern Watermilfoil	5.5	1	0.8	0.5
SE Bay - Northern Watermilfoil	6.5	1	1.2	0.5
Shoreline S of Resort	6.5	1	0.4	0.5
Shoreline W of Channel	5.5	1	0.3	0.0
Grand Total	5.3	9	6.5	2.5

Recommendations: With the new HWM population on Blue Lake, hand harvesting was a good approach to target the single and few plant occurrences. Since HWM was found at 150% more sites in late June compared to what was mapped in early June, it is possible that there could be more HWM occurrences outside of where APM dove. All HWM plants found were located within dense native plant populations. Continued vigilant monitoring and appropriate management efforts are important to prevent the spread of HWM throughout Blue Lake.
